PROJECTS

URL Shortener, React, Express, TypeScript, PostgreSQL, Redis, Docker

- Developed a full-stack URL shortener with TypeScript.
- It uses React as the frontend, Express as the backend, PostgreSQL as the database and Redis as the cache. Implemented CI/CD via GitHub Actions to test and deploy. Local tests are done via Husky.
- Uses Docker with two separate docker-compose files, one for dev and one for prod, to fully containerize the application.
- Demo: s.suatsulun.com

To-Do App, React, Python, FastAPI, TypeScript, PostgreSQL, Docker

- Developed a full-stack To-Do app with TypeScript and Python.
- Uses Python with FastAPI for the backend, TypeScript with React for the frontend, and PostgreSQL as the database.
- Uses Docker with docker-compose to containerize the entire app.
- Demo : todo.suatsulun.com
